

Topic Review

THE LONDON SCHOOL
OF ECONOMICS AND
POLITICAL SCIENCE ■

Topic Review

Over the last four weeks, we've discussed four topics:

- A. Social Media
- B. Gender
- C. Demographics
- D. Climate Change

Your teachers will divide you into groups. Each group will be responsible for one topic.

Task:

Review the material for each topic including:

- Topic input
- Topic listening
- Topic reading
- Academic interaction
- Listening into writing
- Reading into writing
- Questions from 'presentations' classes

Each person in the group will be given 5 cards.

Using information from the topic material, your group should come up with 5 discussion questions.

Each person in the group should write the discussion questions on their cards (1 question per card)

For example:

(Note: these example questions are about AI)

Person A:

Is artificial intelligence a threat to humanity?

Would you prefer to be interviewed by a person or machine?

How do you think AI will impact universities?

In what ways do you think AI will change work?

Will people use AI or still learn languages?

Person B:

Is artificial intelligence a threat to humanity?

Would you prefer to be interviewed by a person or machine?

How do you think AI will impact universities?

In what ways do you think AI will change work?

Will people use AI or still learn languages?

Discussion

- Your teacher will put you into new groups (ideally so that you have someone for each topic).
- Your group should mix your cards and put them in the centre.
- Each person should take it in turn to choose a card and discuss the question.

- Which topic(s) did you enjoy most and least?
- Which topic(s) do you find easiest/most difficult to discuss?
- Do you feel prepared to discuss one of the topics in Practice Paper C for Part 2 (2-minute presentations) and Part 3 (discussion).

Note: topics are assigned at random – your group could be asked to discuss any one of the four topics
