

Listening into Writing

Feedback from Week Three

THE LONDON SCHOOL
OF ECONOMICS AND
POLITICAL SCIENCE ■

Overall strengths from last week:

1. **Strong understanding of the central argument.** Most of you grasped the counterintuitive core idea: while the global population continues to grow, the growth rate has been declining for decades. Many also recognised Sciubba's main claim that demography shapes opportunities and challenges, but human responses remain a matter of choice.
2. **Effective use of the three-scenario framework.** Most papers accurately identified the status quo, fearful, and resilient scenarios and explained how each would respond to demographic change through pensions, migration, pronatalist policies, technology, and health investments.
3. **Some insightful critical evaluation.** The strongest summaries engaged with the presentation's logic. Several noted that the projections are conditional on fertility "staying the same as it is today" which is not guaranteed; that the resilient-world scenario depends on young populations in developing countries even though the talk's own premise is that fertility is falling everywhere; that the first two scenarios have evidence while the third is largely asserted; that "work longer" is not equally feasible for manual workers; and that AI-driven productivity growth, which could offset workforce decline, is ignored.

Overall areas to work on:

1. **Accuracy of figures.** Frequent errors included confusing projected population decline with fertility rates, misreporting key figures (e.g. South Korea's \$210 billion spending, Canada's immigration-driven growth), and misunderstanding timelines or demographic measures. One incorrect figure is a minor slip; repeated inaccuracies undermine the credibility of the.
2. **Keeping the speaker's views separate from your own** Some summaries attributed explanations to Sciubba that she never makes or lost clear attribution so the reader couldn't distinguish summary from comment.
3. **Distinguish main points from supporting details** Some papers became catalogues of statistics, obscuring the core argument. Focus on the key claims and use supporting evidence selectively.
4. **Language**
 - Inconsistent tense in reporting; pick present ("Sciubba argues") or past and stay with it.
 - Spelling of the topic's core vocabulary: *fertility, demographic, ageing, retirement, pension, resilient, Romania* — and the speaker's name, *Sciubba*.

Teacher Feedback

- Your teachers have read your summaries and given you feedback on “strengths” and “areas for improvement”.
- Read your feedback and let your teacher know if you have any questions.

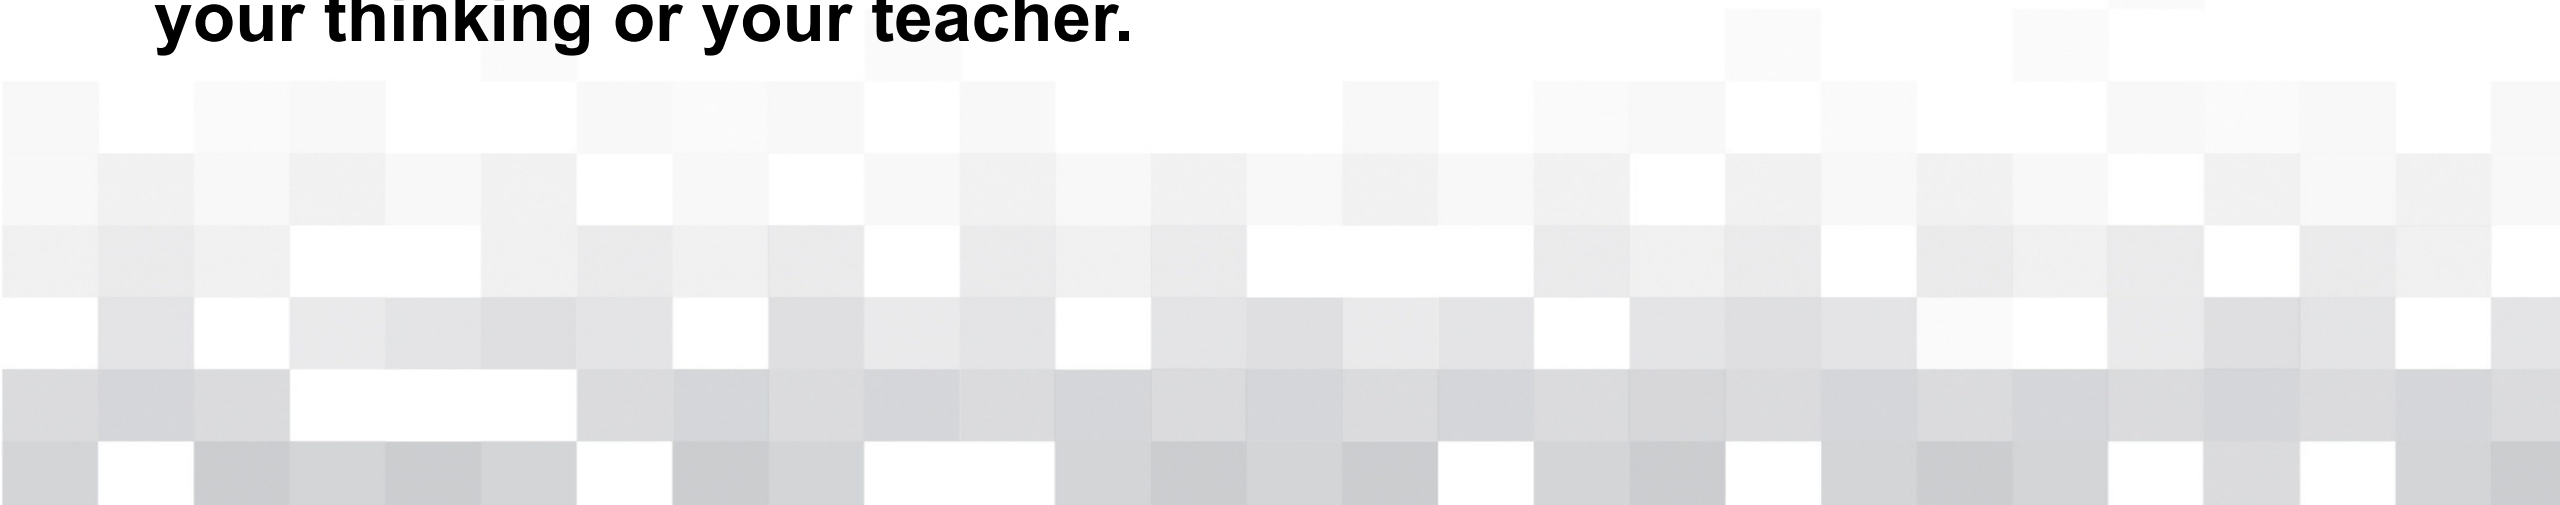

AI Feedback

Now open the **Listening into Writing AI Feedback Workbook** on Moodle and follow the instructions for Practice 3.

If you do not have time to do all the activities in class, please complete them at home.

Remember: AI is a tool to support your learning. It does not replace your thinking or your teacher.

A decorative pattern of light gray and white squares, resembling a pixelated or mosaic effect, located at the bottom of the slide.

Once you have completed the workbook, reflect:

1. Did you find the feedback useful?
2. What, if anything, have you learned?
3. Was there anything that surprised you?
