句架 ① | Paper A

中文触发	English target + example
概括整场讲座的中心观点	A central point in the lecture is that X. 例 A central point in the lecture is that climate disinformation weakens support for collective action.
写清讲者用了哪类证据支持什么主张	The speaker cites [a study/data/an example/personal experience] to support the claim that X. 例 The speaker cites survey data to support the claim that passive social media use is associated with lower well-being.
说明证据对主张究竟起什么作用	This evidence illustrates / supports / qualifies the claim that X. 例 This evidence qualifies the claim that social media use is uniformly harmful.
给出有依据的局部评价	This is persuasive because X; however, Y. 例 This is persuasive because the study compares active and passive use; however, it only examines adolescents.
在收尾处给出有限定的整体评价	Overall, the lecture is effective in X, although it would be stronger if Y. 例 Overall, the lecture is effective in explaining how gender stereotypes shape hiring, although cross-country evidence would strengthen it.
证据支持 X，但不足以推出更强结论 Y	The evidence suggests X, but it does not by itself justify Y. 例 The evidence suggests an association between passive use and anxiety, but it does not justify the claim that passive use causes anxiety.
写可能作用，同时明确没有证明因果	X may contribute to Y, but the evidence does not establish that X causes Y. 例 Gender stereotypes may contribute to occupational segregation, but the evidence does not establish that stereotypes alone cause it.

句架 ② | 五种 thesis

中文触发	English target + example
判断题 判断 X + 正文理由	This essay argues that X because A and B. 例 This essay argues that population ageing is a serious challenge because it increases care needs and shrinks the workforce.
定义 + 原因 当前定义 + 主要机制	In this context, X refers to [defining features]; it persists mainly because A and B. 例 In this context, climate denial means rejecting established climate science; it persists mainly because of political identity and disinformation.
政策回应 行动者 + 优先措施 + 支持性措施	[Relevant actor] should respond to X through A and B, while C should play only a supporting role. 例 Governments should respond to climate misinformation through media literacy and platform transparency, while content removal should play only a supporting role.
原因 + 方案 原因与方案——匹配	X occurs mainly because A and B; addressing it therefore requires C and D. 例 Online gender harassment occurs mainly because anonymity lowers accountability and rules are enforced inconsistently; addressing it therefore requires stronger moderation and clearer reporting.
程度 / 有效性 明确程度 + 条件 + 限制	X is effective to a [limited/moderate/large] extent when Y, although Z limits its impact. 例 Fact-checking is effective to a moderate extent when users trust the source, although motivated reasoning limits its impact.

句架 ③ | 跨文综合

中文触发	English target + example
用自己的判断起段，再用来源支持	X should be treated as Y because Author (Year) shows that Z. 例 Social media risk should be treated as uneven because Kross et al. (2021) show that effects vary across users.
两份来源共同支持同一判断	Taken together, X and Y suggest that Z. 例 Taken together, the small average effect and wide variation suggest that social media does not affect everyone equally.
比较来源的视角、因果力度或分析层级	X takes a more qualified / causal / individual-level view than Y. 例 Prentice and Carranza (2002) take a more individual-level view of gender stereotypes than Ellemers (2018), who focuses on institutions.
写出共同点，同时保留真实未决问题	Taken together, these sources suggest X, but Y remains contested. 例 Taken together, these sources suggest that lower fertility accelerates population ageing, but future labour shortages remain contested.

句架 ④ | 意思保护

中文触发	English target + example
研究发现用过去时；当前解释或一般主张用现在时	Report study-specific findings in the past; state current interpretations or general claims in the present. 例 The survey found that women received more hostile replies. This pattern suggests that gendered abuse remains widespread.
证据只让解释变得合理，尚未证明	suggest / suggest that ... 例 The results suggest that passive social media use may be linked to lower perceived social support.
区分强证据与例子	demonstrate ≠ illustrate 例 One case illustrates climate misinformation; it does not demonstrate how common the problem is.
把可争辩立场归给作者	argue / argue that ... 例 Kross et al. (2021) argue that social media effects depend on how platforms are used.
中性报告研究观察或结果	report / report that ... 例 The study reports that fertility rates fell across all four countries.
只写联系，不写因果	X is associated with Y 例 Passive social media use is associated with lower life satisfaction.
区分部分促成、较强导致和反向来源	contribute to → lead to / result in ← result from 例 Economic insecurity may contribute to lower fertility, which can lead to population ageing; population ageing can also result from longer life expectancy.
改写时，语气、范围、因果和观点归属不能变	When paraphrasing, keep the original level of certainty, scope, causal meaning and source. 例 Source: The study found an association among some adolescents. Safe: The research reported a link in a subset of young people.

EXTENSION 01-07

句架 ⑤ | 高收益升级

中文触发	English target + example
把来源差异推进为自己的推论	What this contrast implies is that X. 例 What this contrast implies is that climate messages should be tailored to different audiences.
评价来源主张的依据和遗漏	Author's claim that X is supported by Y, but it does not account for Z. 例 Maertens et al.'s (2020) claim that inoculation builds resistance is supported by experiments, but it does not account for long-term behaviour.
从证据谨慎推出自己的判断	On the basis of X, it may / might / could be argued that Y. 例 On the basis of the reported age differences, it could be argued that one social media policy will not protect all users equally.
把综合发现连接到政策含义	These findings suggest that X; at policy level, Y. 例 These findings suggest that childcare costs discourage larger families; at policy level, affordable childcare should be prioritised.
让 this / these / such 的指代清楚	This / These / Such + precise noun 例 These differences in online behaviour help explain why average effects are small.
直接写研究范围限制	generalise beyond the sample / to a wider population 例 The results cannot be generalised beyond the urban sample to the wider population.
保持原因、方案和步骤的并列结构	Keep coordinated items parallel. 例 Effective climate policy requires reducing emissions, investing in adaptation and supporting vulnerable communities.
