

Listening into Writing

Feedback from Week One

THE LONDON SCHOOL
OF ECONOMICS AND
POLITICAL SCIENCE ■

General feedback from last week

- Most submissions followed a clear structure, with clear outlining of the ideas
- Most people included the four main solutions suggested by the speaker
- Some summaries were over the word limit. Your summary should be around 200 - 400 words
 - Some of your summaries last week were substantially more than this
 - Try to decide what are the **main ideas** in the speech and what are **extra details** which can be left out

Referring to the speaker

- You can just refer to them as “the speaker”
- If you are using their name, you can use their full name or last name
 - Dr. Justin Romano
 - Romano
- You should not refer to the speaker by their first name
 - Justin

Some common issues with word forms

“addictive” vs “addiction” vs “addicted”

Which of these is a **noun**? Which is a **verb**? Which is an **adjective**?

1. Social media is highly _____.
2. Increasing numbers of young people are _____ to social media.
3. Increasing numbers of young people are suffering with _____ to social media.

As with other assignments at LSE, your summaries should be written in a **formal academic style**.

It is quite common to be more informal when speaking than writing, even in an academic setting (such as when giving a lecture or presentation).

The speaker last week referred to “**kids**”. What would be the more formal word for this?

Teacher & AI Feedback

- Your teachers have read your summaries and given you feedback on “strengths” and “areas for improvement”.
- Read your feedback and let your teacher know if you have any questions.

There is no one approach to the use of generative AI across LSE. The School allows different approaches to be taken by different academic departments and course convenors. Within the School's guidance, there are three positions:

Position 1: No authorised use of generative AI in assessment.

Position 2: Limited authorised use of generative AI in assessment

Position 3: Full authorised use of generative AI in assessment.

Artificial intelligence

When you begin your degree, you will need to ensure that you are familiar with the AI policy on your courses.

If you would like to develop your AI literacy, take a look at this Moodle course: [Course: Generative AI: Developing your AI Literacy | Moodle](#)

Language feedback

In today's class, we would like you to use AI to get more feedback on how to improve the language in your essay.

Open the **Listening into Writing AI Feedback Workbook** on Moodle and follow the instructions. Make sure you read the Golden Rules about using AI. You can choose which tool you would like to use e.g. Copilot, Claude, ChatGPT, Deepseek...

Important: AI is a tool to support your learning. It does not replace your thinking or your teacher.

Once you have completed the workbook,
discuss:

1. Did you find the feedback useful?
2. What, if anything, have you learned?
3. Was there anything that surprised you?
